General Comments

This nurse discussed SE of the COVID vaccines and normal expected Reactions. Due to offender having warm clammy skin, chills and body aches this nurse did offer one day lay in as the normal time frame to adjust to booster is 24-48 hours. Offender to monitor his pulse and report if it continues to be elevated to fill out a health care and let medical know. Offender voiced understand,

Subjective Information

New issues/stressors/extraordinary events presented today: New issue resolved, no update required

Explanation: Patient was seen in MHP's office for her HCR submitted 11/3/21, received/screened 11/4/21 (routine), stating she wanted to speak with "Ms. Martinez". During session, patient acknowledged that she has been having difficulty with starting a group that focuses on LGBTQ topics in relation to religion. She stated that she has been receiving verbal "abuse" from other offenders as she attempts to form this group for other women in the dorm. She identified herself as being strong and vulnerable at the same time. Vented about housing requirements as the transgender community often has to bunk with male offenders. She acknowledged her faith and self identity as her greatest strengths.

Goals, Objectives, and Interventions Addressed Today

Goal Today	Objective Today
Depressive symptoms do not impair daily functioning	Verbalizes increased feelings of self worth

Interventions/Methods Provided:

MHP Utilized active listening while patient discussed her current barriers and coping skills.
Asked patient how she reminds herself of her confidence and strengths
Encouraged patient to continue pursuing her goal of starting the group as it seems that it will provide the LGBTQ community at CIF with much needed support.

Response to Interventions/Progress Toward Goals and Objectives:

Patient remained cooperative and respectful throughout the session. She was communicative about her current barriers and strengths.

Current Assessment

Individual's progress: Some progress

Assessment:

Anxiety is not significant. Cognitive issues are not significant. Substance abuse/dependence is not significant. Depression is significant. Impulse control is not significant. Psychotic symptoms are not significant. Suicidality is not significant. Mania/manic behavior is not significant. Patient is responding to treatment plan. The patient is compliant with the treatment plan. The patient is cooperative and communicative.

Risk Assessment

CURRENT ENCOUNTER

Risk Assessments	
Patient denies suicidal ideation, plan, intent, and/or attempt.	
Patient denies property damage ideation, plan, intent, and/or attempt.	
Patient denies homicidal ideation, plan, intent, and/or attempt.	

RISK ASSESSMENT HISTORY

Risk	Current	Past	Documented	Event Date	Approximate Date	Ideation	Plan	Intent	Scale
Suicide	Denies		11/10/2021	11/10/2021	No				
Property	Denies		11/10/2021	11/10/2021	No				

Patient Name: RICHARDSON, JONATHAN
ID: 127630 Date of Birth: [REDACTED]

Page 15 of 182
Encounter Date: 11/10/2021 12:14 PM

Homicide Denies 11/10/2021 11/10/2021 No

Attempt	Planned/ Impulsive	Drug/Alcohol Influenced	Medically Treated	Plan Attempt Description
---------	-----------------------	----------------------------	----------------------	--------------------------

SAFETY MANAGEMENT PLAN

No currently expressed suicidal or homicidal ideation or intent. No current need for safety plan.

Assessment/Diagnosis

AXIS IV

Severity: Moderate

Problem Type	No/Yes	Description
Primary Support Group	Yes	Very little external support
Social environment	Yes	Difficulty Trusting Others - suspicious - isolates
Legal system/crime	Yes	Incarcerated

AXIS V

Current GAF: 70

Date: 07/01/2021.

Highest GAF: 70

Date: 05/03/2021.

Plan and Additional Information

PATIENT: JONATHAN RICHARDSON
DATE OF BIRTH: [REDACTED]
DATE: 10/21/2021 08:44 AM
VISIT TYPE: Chronic Care Visit

History of Present Illness:

1. hyperlipidemia
Risk factors include sedentary life style. Pertinent negatives include chest pain, claudication, constipation, diarrhea, dyspnea, heartburn, hematuria, nausea, palpitations, polyuria and vomiting.
2. asthma
The initial visit date was 02/12/2008. Symptoms of asthma began in 1984. Pertinent negatives include irregular heartbeat/palpitations and wheezing.
3. gender identity disorder

PROBLEM LIST:

Problem Description	Onset Date	Chronic	Clinical Status	Notes
Gender identity disorder of adulthood	06/17/2020	N		
Gastroesophageal reflux disease	02/19/2015	Y		Mapped from KBM Chronic Conditions table on 05/09/2016 by the ICD9 to SNOMED Bulk Mapping Utility. The mapped diagnosis code was Esophageal reflux, 530.81, added by Paul A. Talbot, MD, with responsible provider Paul A. Talbot MD. Onset date 02/19/2015.
Borderline personality disorder	05/04/2010	Y		Mapped from KBM Chronic Conditions table on 05/09/2016 by the ICD9 to SNOMED Bulk Mapping Utility. The mapped diagnosis code was Borderline personality disorder, 301.83, added by Darla Hinshaw, MD, with responsible provider . Onset date 05/04/2010; Axis II.
Recurrent major depressive episodes, mild	10/21/2019	N		

Problem List (not yet mapped to SNOMED-CT®):

RICHARDSON, JONATHAN 127630 [REDACTED] 10/21/2021 08:44 AM 18/182

Problem Description	Onset Date	Notes
Asthma	03/19/2007	
Polysubstance Dependence	01/17/2011	
major depression in remission	01/17/2011	
Nonspecific reaction to tuberculin skin test witho	02/01/2011

Assessment/Plan

#	Detail Type	Description
1.	Assessment	Asthma (493.90).
	Impression	Offender is on Xopenex. He uses his inhaler rarely, <1x/week No acute exacerbations. Lung sounds not assessed today d/t telehealth visit. Offender is breathing comfortably, speaking in complete sentences..
	Patient Plan	Continue current medications as prescribed. Continue to monitor labs in CCC per protocol. Encouraged healthy dietary choices & daily exercise.
2.	Assessment	Hypercholesterolaemia (272.0).
	Impression	LDL 103. Offender is not currently on a statin. Denies CP/SOB.
	Patient Plan	Continue to monitor labs in CCC per protocol. Encouraged healthy dietary choices & daily exercise.
3.	Assessment	Gender identity disorder in adults (302.85).
	Impression	Offender is on estradiol & spironolactone for transition to female gender. He has no medical c/o today. Testosterone 263.41, has not dropped significantly since starting the medication..
	Patient Plan	Spironolactone increased to 50mg daily for testosterone suppression. Continue to monitor labs in CCC per protocol.
	Provider Plan	Offender was assessed via telehealth. CCC clerk L. Holloway was present with the patient during the entire encounter. Crawford NP delivered services from her office located in Indiana. The patient consent for telehealth was present in the patient health record. The patient's ID was verified by having him hold his inmate ID in front of the telehealth camera for the provider to verify. The patient was afforded the opportunity to ask questions regarding the use of the telehealth platform.

Medications (Added, Continued or Stopped today)

Start Date	Medication	Directions	PRN Status	PRN Reason	Instruction	Stop Date

Subjective Information

New issues/stressors/extraordinary events presented today: New issue resolved, no update required

Explanation: Patient Richardson was seen for his HCR submitted 10/6/21, received/screened 10/8/21 (routine), stating she wanted to speak with "MH: Martinez". During session, patient discussed wanting to become more comfortable with her "emotional" side. She stated that through years of trauma and mental health concerns she has had to remain emotionally strong and has not had the opportunity to enjoy emotional vulnerability. She described herself as being impatient at times and having barriers with her anger. She acknowledged that she has experienced growth and hopes to continue on this path. Patient acknowledged that she does not consider herself transgender, but rather a woman.

Goals, Objectives, and Interventions Addressed Today

Goal Today	Objective Today
Depressive symptoms do not impair daily functioning	Verbalizes increased feelings of self worth

Interventions/Methods Provided:

MHP provided a safe and non judgemental space for patient to discuss her current emotional barriers and how she has adapted to those barriers. Inquired about her past coping skills and her self perception. Praised patient for her ability to develop an in depth understanding of her mental health goals and strengths.

Response to Interventions/Progress Toward Goals and Objectives:

Patient remained cooperative and respectful throughout the session. She was inquisitive and communicative about her current experience.

Current Assessment

Individual's progress: Some progress

Assessment:

Anxiety is not significant. Cognitive issues are not significant. Substance abuse/dependence is not significant. Depression is significant. Impulse control is not significant. Psychotic symptoms are not significant. Suicidality is not significant. Mania/manic behavior is not significant. Patient is responding to treatment plan. The patient is compliant with the treatment plan. The patient is cooperative and communicative.

Risk Assessment

CURRENT ENCOUNTER

Risk Assessments

Patient denies suicidal ideation, plan, intent, and/or attempt.

Patient denies property damage ideation, plan, intent, and/or attempt.

Patient denies homicidal ideation, plan, intent, and/or attempt.

RISK ASSESSMENT HISTORY

Risk	Current	Past	Documented	Event Date	Approximate Date	Ideation	Plan	Intent	Scale

STATE001622

Goal 4: Mismatch between assigned gender and gender identity no longer causes marked distress. (continued)

Start date: 07/22/2019

Target date: 02/23/2022

Assessed need: Evaluation for gender dysphoria

Individual's strength/skills: {local.txt_stengths}

Potential barriers: {local.txt_barriers}

- Objective 1: Identify ways in which gender identity leads to distress, exacerbates symptoms of depression, and contributes to other concerns such as irritability and self-destructive behavior. (continued)

Start date: 08/27/2020

Target date: 02/23/2022

Adjusted target date: (Adjusted as per IAP review dated 05/01/2018)

-- Intervention 1: Person-centered, supportive, solution-focused interventions

Modality: Individual therapy

Frequency: q 90 days

Type of provider:

Psychologist

TRANSITION/DISCHARGE CRITERIA

Discharge plan:

8/23/21: Patient Autumn (Richardson) was seen for her 90 day routine monitoring and TPR. She denied significant mental health concerns, but acknowledged symptoms of grief over her two best friends being moved to another facility. She described being grateful to them for accepting who she is. She will continue to be monitored every 90 days.

8/27/20 - Richardson has been diagnosed with gender dysphoria and started hormone therapy. She has shown an improvement in mood, irritability, and interpersonal relatedness. An overarching goal for the next treatment period will be to continue to explore and grow into her role living as a woman.

Individual has participated in the development of this plan:

Yes

Others participated in the development of this plan:

No

Subjective Information

New issues/stressors/extraordinary events presented today: New issue resolved, no update required

Explanation: Patient was seen for her 90 day routine monitoring and TPR. She denied significant mental health concerns, but acknowledged that she is experiencing symptoms of grief over having been separated from her two best friends. She acknowledged that she likes to be called (Autumn) and her pronouns are she, her, hers. She described her faith and stated that she believes in the spirituality of all religions and the healing that it provides to others.

Goals, Objectives, and Interventions Addressed Today

Goal Today	Objective Today
Mismatch between assigned gender and gender identity no longer causes marked distress.	Identify ways in which gender identity leads to distress, exacerbates symptoms of depression, and contributes to other concerns such as irritability and self-destructive behavior.

Interventions/Methods Provided:

MHP provided a safe and non judgemental space for patient Richardson to discuss her transition and her goals for her future. Validated her thoughts and feelings given the years she spent living as a man when she identifies as female. Inquired about her adaptive coping strategies. Encouraged her to write an HCR if she needs to be seen before her next 90 day MH monitoring.

Response to Interventions/Progress Toward Goals and Objectives:

Patient Autumn was cooperative and respectful throughout the session. She was communicative about her recent symptoms of grief and was receptive to MHP's feedback.

Current Assessment

Individual's progress: Some progress

Assessment:

Anxiety is not significant. Cognitive issues are not significant. Substance abuse/dependence is not significant. Depression is significant. Impulse control is not significant. Psychotic symptoms are not significant. Suicidality is not significant. Mania/manic behavior is not significant. Patient is responding to treatment plan. The patient is compliant with the treatment plan. The patient is cooperative and communicative.

Risk Assessment

CURRENT ENCOUNTER

Risk Assessments

MENTAL STATUS CLASSIFICATION

BH Code: D

- A.** Free of mental illness
- B.** Psychiatric disorder that causes little functional impairment and requires infrequent psychiatric services. These services are routine in nature.
- C.** Psychiatric disorder that causes some functional impairment and requires frequent psychiatric and/or psychological services. These services may be routine and/or unplanned in nature and may involve mental health monitoring.
- D. x** Psychiatric disorder that causes some impairment and requires frequent psychiatric and/or psychological services and/or the individual has a history of a serious suicide attempt while in a correctional setting. Services needed may be routine and/or unplanned in nature and may involve mental health monitoring.
- E.** Psychiatric disorder that causes significant functional impairment such that the individual is unable to function in a standard prison environment and requires structured psychiatric and/or psychological services. Services needed are provided in a specialized mental health unit. There is a good prognosis for improvement in functional impairment and eventual movement to a less restricted environment.
- F.** Psychiatric disorder that causes acute or chronic extreme functional impairment such that the individual is unable to function in a standard prison environment and/or causes significant risk of harm to the individual or others around the individual and requires extensive structured psychiatric and/or psychological services. Services needed are provided in a specialized mental health unit. There may be a poor prognosis for improvement in functional impairment and eventual movement to a less restricted environment.

Subjective Information

Individual's report of progress towards goals/objectives since last session:
 Ofd. seen for scheduled follow-up visit. She reports no major change in work, housing, or social functioning. She asks several questions about the normal timeline that transgender individuals may be expected to follow in regard to hormone therapy, feminizing surgical intervention, etc., and says that she plans to pursue all options available to her. Otherwise, there are no new concerns or developments. She was pleased to realize she has been on hormones for a year already.

New issues/stressors/extraordinary events presented today: None reported

Goals, Objectives, and Interventions Addressed Today

Goal Today	Objective Today
Depressive symptoms do not impair daily functioning	Verbalizes increased feelings of self worth

Interventions/Methods Provided:

Psychologist assessed adjustment and functioning. Engaged with the offender in research as to common community guidelines for different approaches to transgender healthcare and treatment of gender dysphoria. Encouraged ofd. to continue to advocate for her care while also working on her patience in order to cope with the appearance that things move slowly.

Response to Interventions/Progress Toward Goals and Objectives:
 Stable.

Current Assessment

Individual's progress: Some progress

Assessment

Anxiety is not significant. Cognitive issues are not significant. Substance abuse/dependence is not significant. Depression is not significant. Impulse control is not significant. Perception: WNL
Hallucination: Denied None evidenced
Thought content: Within normal limits
Delusions: None Reported
Cognition: Within normal limits
Intelligence estimate: Average
Insight: Within normal limits
Judgment: Within normal limits

Subjective Information

Individual's report of progress towards goals/objectives since last session:

Ofd. seen for scheduled follow-up visit. Denies any new mental health concerns. Reports that work in the kitchen continues to go well, getting along in housing unit, and some tension in her social group continues. Denies SI/HI or any other pressing concerns about health or well-being.

New issues/stressors/extraordinary events presented today: None reported

Goals, Objectives, and Interventions Addressed Today

Goal Today	Objective Today
Depressive symptoms do not impair daily functioning	Identifies negative thinking supporting depression

Interventions/Methods Provided:

Psychologist discussed prison life with ofd. including ofd's adjustment to the rules of prison and the way that they are sometimes inconsistently enforced. Explored ofd's notions of fair/unfair enforcement of rules and her relatively black and white stance on offenders getting in trouble for relatively minor violations. Encouraged ofd. to examine the risks and benefits of being more flexible in her thinking about rules and compassion to others when they become frustrated. Validated the safety that comes from adopting a black and white mentality on such issues.

Response to Interventions/Progress Toward Goals and Objectives:

Stable.

Current Assessment

Individual's progress: Some progress

Assessment

Anxiety is not significant. Cognitive issues are not significant. Substance abuse/dependence is not significant. Depression is not significant. Impulse control is not significant. Psychotic symptoms are not significant. Suicidality is not significant. Mania/manic behavior is not significant. Patient is responding to treatment plan. The patient is compliant with the treatment plan. The patient is cooperative and communicative.
